

Why Do I Do Art

I do art because I deeply love color and light and being able to move it around on canvas or paper fills me with joy. I want to create until my last breath, I can do no less and be true to myself.

Having this chance to paint daily I am in Nirvana. I am turning out several paintings a month and just completed a set of illustrations for a children's book. I have never been so happy!!! I live in a house painted inside and out (all those blank walls just screamed for illustrations!) with my husband and a number of cats. I am one of the most joy filled people alive!! Does that answer your query?

Live harmoniously, practicing love and compassion.

If you want PEACE, you must give up the idea of conflict entirely and for all time.
